Subject: DHS/FEMA IND Implementation Forum
Importance: High

Colleagues,

FEMA's CBRNE Branch would like to formally invite you to participate in the upcoming IND Implementation Forum. This Forum is focused on identifying a path forward to closing the capability gaps discussed in the April IND Strategy Forum and identified in the *DHS Strategy for Improving the National Response and Recovery from an IND Attack*. It will be a 2 ½ day event taking place at the Washington DC, Hyatt Capitol Hill Hotel (<http://washingtonregency.hyatt.com/hyatt/hotels/index.jsp>), from September 21st – 23rd. The conference will consist of plenary sessions, technology demonstrations and individual working sessions.

These sessions will cover four major capability gap areas: Research and Development, Communications (i.e., pre/post event messaging and communications infrastructure), Recovery, and Public Health & Medical. We ask that you pre-select the session you plan to attend so we can ensure the appropriate accommodations.

To RSVP for the event, please visit the registration tool at the link provided below and enter the unique conference code on the first page. This will provide access to the Forum registration page. Please note, a detailed agenda and hotel directions/logistics will be added as links early next week.

Registration Link: <https://www.enstg.com/Signup/>

Conference Code: DHS86234
